D-85540 Haar
Germany

To our customers

January 2013

Softing complies with the EU Directive RoHS-2

(EU Directive 2011/65/EU „Restriction of the use of certain hazardous substances in electrical and electronic equipment” RoHS)

As with the old RoHS-Directive (2002/95/EC) Softing products comply with the new directive 2011/65/EU, valid since January 2013.

Our products (which are category 9 - industrial monitoring and control instruments) fulfill already today the limits of hazardous substances like lead or cadmium, although they are excluded from this directive until July 22, 2017.

If you have any further questions regarding this subject, please get in touch with your contact in Sales and Marketing.
